cencora

Revolutionize your 340B inventory management

Your solution is here.

Simplify inventory management, enhance compliance, and move your pharmacy forward

Say goodbye to the headaches of physical inventory management with Cencora's proprietary Inventory Synchronization Program (ISP). This innovative solution empowers contract pharmacies and their covered entity partners to streamline their operations by removing the burdens associated with physical replenishment.

Simplified operations
Minimize impact on high accumulations and returns processing

Accelerated invoicing
Speed up invoicing for non-inventory purchases

Streamlined returns
Eliminate the hassle of managing physical product and processing returns

Enhanced compliance
Reconcile claims virtually instead of returning physical products

Product availability
Access out-of-stock and allocated items

The future state
With the track and trace regulations of the Drug Supply Chain Security Act (DSCSA), ISP offers an alternate solution for replenishment orders that will not require serialized tracking as there is no physical product shipped or returned.

Gain a competitive edge and leave outdated challenges behind

Ask your Third-Party Administrator to find out if they are participating in Cencora's ISP solution.
