

## Dose tracking solution

Single-dose, disposable packaging monitors patient adherence in real-time

Designed to help increase patient adherence, AmerisourceBergen's dose tracking solution combines real-time dose monitoring for oral solids with convenient single-dose packaging – creating a scalable solution for any product with a strict dosing regimen.

### Delivers value without disrupting patient or healthcare provider workflows

- No gadget return
- No network setup
- No additional structure
- Self-contained disposable packs

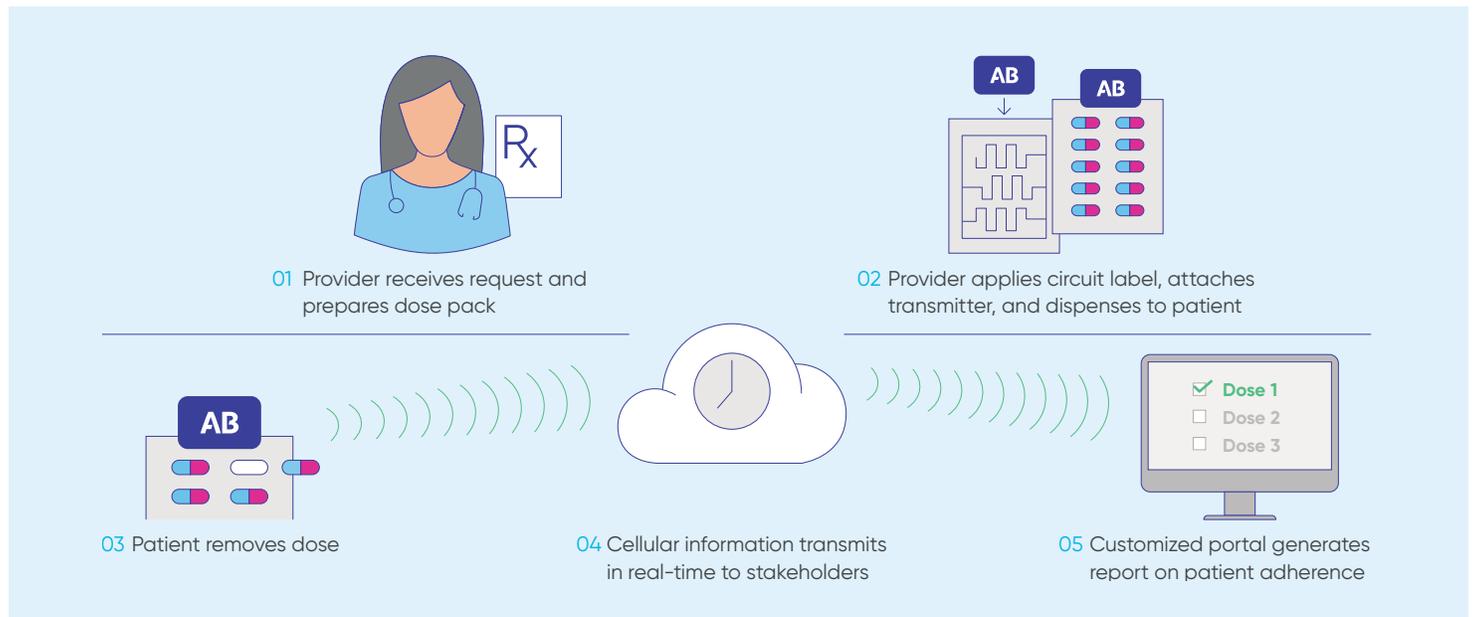

### Encourages adherence without requiring patients to do more

- Patient-centric innovation built around patient behaviors
- Records and communicates adherence information in real time
- Disposable, cellular connectivity means no patient record keeping or inconvenience

### Provides immediate visibility into HIPAA-compliant data to improve care planning

- No wait for utilization data
- Online, centralized dashboard for oversight of one or more locations
- Cellular information transmitted in real time to defined stakeholders
- Customized patient portal reports
