

In-home storage solution

Providing safe, immediate access to critical medications at home

AmerisourceBergen's in-home storage solution provides patients with safe, immediate access to lifesaving medications at home. Physicians, manufacturers, and payers gain visibility to how and when medications are used in the real world to help improve the way they serve patients and the broader healthcare community.

Monitored medications in easy reach

- Easily fits on desktop or countertop
- Intuitive patient interface for quick and accurate data capture
- Secure, easy access may help enhance patient adherence

Customizable, turnkey, and efficient

- Self-contained infrastructure allows for quick installation
- User interface can be tailored for specific scenarios
- No complicated network or installation costs and no capital outlay for hardware or maintenance
- Increases security and may reduce human error

Captures utilization and patient data to drive informed care

- Provides visibility to all partners, such as doctors, pharmacists, and caregivers
- Enables product tracking and automates reorders 24/7/365
- Easily generates reports for actionable insights

Meeting patient needs with a customizable interface

- Touchscreen works easily for patients of any age, while ensuring peace-of-mind security
- Patient data is quickly captured and shared to all appropriate stakeholders
- Options include video or written instructions, toll-free patient assistance number, and multiple languages
